Information Section  
Bureau of Standards, Washington  
Circular  
LC 417

May 29, 1934

PUBLICATIONS ON THERMAL EXPANSION

This letter circular gives a list of publications of the Thermal Expansion Laboratory of the National Bureau of Standards. The publications for which prices are indicated may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C. Remittance should be made by coupons (which may be purchased from the Superintendent of Documents in sets of 20 for \$1.00), postal money order, express order, or New York draft payable to the "Superintendent of Documents, Government Printing Office, Washington, D.C." Currency may be sent at the sender's risk. Postage stamps, defaced coins, or foreign money will not be accepted. Publications marked with a star (\*) are out of print, but they may be consulted at most large libraries.

"Outside publications" are not for distribution or sale by the Government. These publications may be consulted at most large libraries or in some cases may be purchased directly from the publishers.

The index at the end of the letter circular will assist the reader in locating the publications on the subjects in which he is interested.

Engineering Societies, 29 West 39th Street, New York City, maintain a duplicating service and are prepared to supply photostat copies of technical articles that are available in libraries of New York City.

New publications of the National Bureau of Standards are listed each month in Technical News Bulletin of the Bureau of Standards, obtainable from the Superintendent of Documents, Government Printing Office, Washington, D. C. The subscription price is 50 cents per year (United States, its territories and possessions; Canada, Cuba, Mexico, Newfoundland, and Republic of Panama); 70 cents in other countries.

PUBLICATIONS FROM THE NATIONAL BUREAU OF STANDARDS

The numbers assigned (for example, S215, T335, RP29) are the actual reprint numbers by which the Bureau and the Government Printing Office lists and sells, respectively, the separate papers (reprints).

Scientific Papers

Number

- S215\* Gray, A. W., Micrometer microscopes, B.S. Bull., vol. 10, p. 375, 1914.
- S219\* Gray, A. W., Production of temperature uniformity in an electric furnace, B.S. Bull., vol. 10, p. 451, 1914.
- S276\* Gray, A. W., Protected thermoelements, B.S. Bull., vol. 13, p. 283, 1916.
- S321 Merica, P. D., and Schad, L. W., Thermal expansion of alpha and of beta brass between 0 and 600°C, in relation to the mechanical properties of heterogeneous brasses of the Muntz metal type, B.S. Bull., vol. 14, p. 571, 1919. (Price 10¢)
- S332 Schad, L. W., and Hidnert, P., Preliminary determination of the thermal expansion of molybdenum, B.S. Sci. Papers, vol. 15, p. 31, 1919. (Price 5¢)
